

Quadro

Quadro is an acoustic wall module series featuring three different square shapes with engraved line pattern, allowing users to create their own unique compositions. The modules' patchwork-like appearance is accentuated by their varying thicknesses and curated color palettes. They can be rotated 90 degrees to change the pattern direction, providing endless possibilities for customisation. Elevate your space with Quadro's minimalistic design, enhancing both acoustic quality and visual appeal. Choose from our range of designer color palettes or specify a custom palette to match your requirements.

* Depth: 50 / 70 / 80 mm.

All quadro modules are available in 3 different depths for a better acoustic effect and a more dynamic appearance

Sound absorption coefficient according to ISO 11654

Maintenance

Vacuum to remove dust. Clean stains with cloth and water, avoiding rubbing. Use detergent or spot remover for tough stains, testing first in inconspicuous area.

Material / PET Felt

With its textile like appearance, PET felt is a great choice for use in interior design and decorative applications. Despite its soft look, PET felt has good impact-resistance, making it a durable option for long-term use, even in demanding spaces. The open structure of felt is one of its key features, as it contributes to its outstanding acoustic properties. This means that the material can effectively absorb sound, making it an ideal choice for our products.

Custom colors

We offer a range of customized products and services to help you achieve your desired outcome. Our standard products can be personalized to match any specific color or palette. Please note that our printed colors may differ slightly from your reference due to our raw material's natural appearance (see picture for reference), but we always do our best to match your specific color as closely as possible. To ensure this, we encourage you to send us a standard color code (NCS or PANTONE) or a reference swatch.

To customize the color of your Slope acoustic module, we require two color codes - one for the front face and a second one for the edge. To maintain its original appearance, we suggest that you choose a edge color that contrasts the front face color. However, if you have only one color reference, you can contact us, and we will help you find the perfect combination.
