# Stille

"Stille" is a versatile room divider that elegantly fits in between. Designed with adaptability in mind, Stille comes in two different heights with an additional top module that allows for 8 distinctive configurations. Its sleek and sophisticated design is available in a range of color palettes, from neutral shades to bold and vibrant hues, or you can even specify your own custom color to perfectly complement your requirements. Whether you're looking to create a private workspace or divide a shared area, Stille is the perfect solution for adding functionality while also offering exceptional acoustic properties.

Acoustic
Tested according to ISO 354.
Complete report available on request.
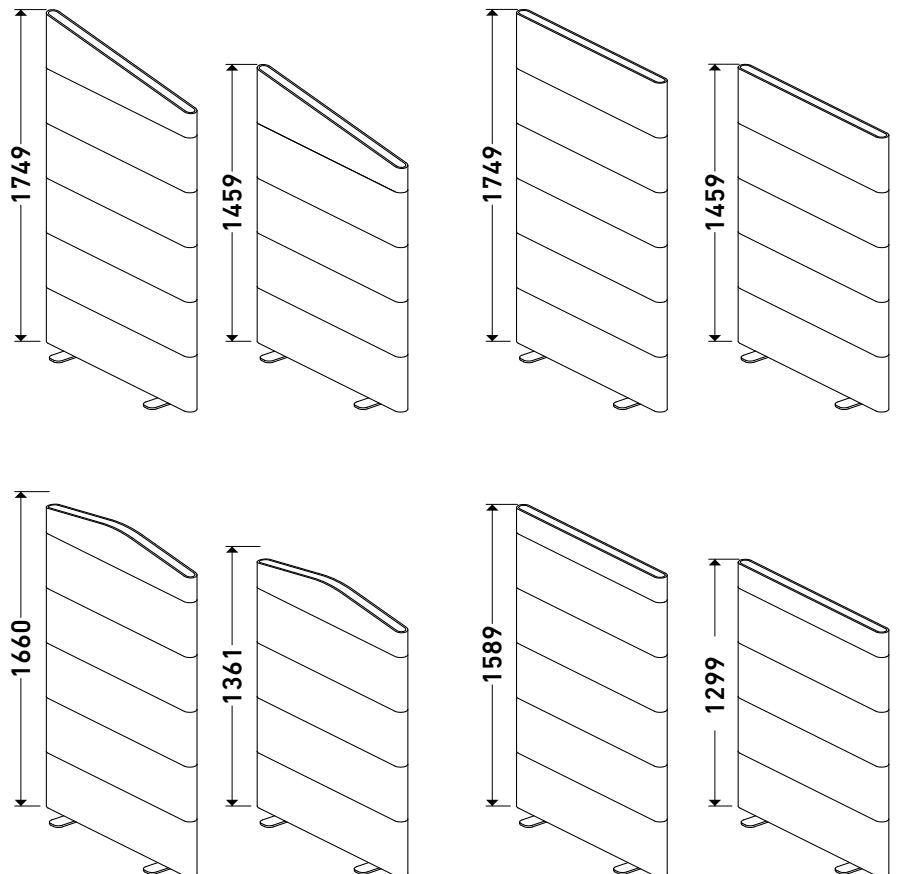

Fire Rating
B-s2-d0

Maintenance
Vacuum to remove dust. Clean stains with cloth and water, avoiding rubbing. Use detergent or spot remover for tough stains, testing first in inconspicuous area.
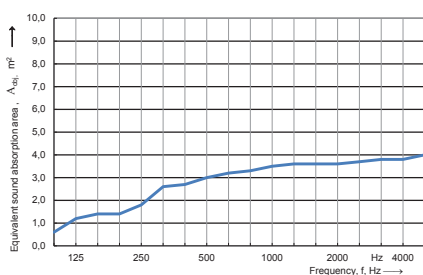

Material / PET Felt
With its textile like appearance, PET felt is a great choice for use in interior design and decorative applications. Despite its soft look, PET felt has good impact-resistance, making it a durable option for long-term use, even in demanding spaces. The open structure of felt is one of its key features, as it contributes to its outstanding acoustic properties. This means that the material can effectively absorb sound, making it an ideal choice for our products.

Custom colors

We offer a range of customized products and services to help you achieve your desired outcome. Our standard products can be personalized to match any specific color or palette. Please note that our printed colors may differ slightly from your reference due to our raw material's natural appearance (see picture for reference), but we always do our best to match your specific color as closely as possible. To ensure this, we encourage you to send us a standard color code (NCS or PANTONE) or a reference swatch.

To customize the color of your Stille acoustic room divider, we require specific color codes for each color you desire. two color codes for DUO version - one for the body and a second one for the top, or five diferent color codes for STRIPES version. However, if you have only one color reference, and are unsure about the other colors, you can contact us and we will help you find the perfect combination.
